## Profile

---

Dynamic and results-oriented Software Developer with a comprehensive skill set encompassing both front-end and back-end development. Specialized expertise in Python Django, Java, Restful API's, HTML5, PHP Laravel, Networking, JavaScript, CSS, and MySQL. Ability to lead and collaborate with cross-functional teams in designing and implementing high-quality web applications. Adept at fostering a collaborative and innovative team environment while ensuring project efficiency and success. Passionate about staying abreast of emerging technologies and implementing best practices to drive innovation and efficiency in software development projects.

## Key Skills

---

- **Django:** Proficient in developing web applications using Django framework, with a focus on creating secure, maintainable, and feature-rich solutions.
- **Restframe Work:** Proficient in designing, developing, and maintaining RESTful APIs and services, adhering to industry best practices and standards.
- **Java:** Extensive experience in Java development, including enterprise-level applications, backend systems, and web services. Skilled in utilizing Java frameworks and libraries to develop scalable and maintainable codebases, adhering to best practices and design patterns.
- **Laravel:** Solid understanding of Laravel framework, with the ability to develop custom web applications and APIs. Proficient in leveraging Laravel's features for rapid development, code organization, and implementing complex business logic.
- **HTML/CSS:** Strong command of HTML and CSS for designing responsive and visually appealing user interfaces. Skilled in implementing modern web design principles, cross-browser compatibility, and accessibility standards to deliver an exceptional user experience.

## Other Skills

---

- Effective communication and Collaboration skills.
- A team leader.
- Interface Design and Implementation
- Creative design
- Project Management
- A team player.
- Full Stack Development
- Networking.

## Projects

---

### 1. Court system:

I created this project in the early 2023. Its a web based court system developed using **Django** framework whereby it simplifies the work in the court. It holds the court cases. It also contains the lawyers information where one can find available lawyers.

The project has been uploaded to my git-hub account.

### 2. Personal blog:

I started these project at July 2023. Its designed using **Laravel**. The aim of the project was to test my proficiency in Laravel performing the CRUD functionality. It involved finding the topic of interest and exploring adding posts and talking about them in details. One can also mail the Post owner in the website. The project is also available on my git-hub account.

### 3. Code-Editor:

This is a web based application developed using **Django** framework whereby I created a console for writing and executing code for different languages.

### 4. Video streaming application:

this is a web based application using just **HTML, JavaScript** and CSS and a third party Sdk called Agora Sdk. These was to test the efficiency of the agora sdk by using a few lines of code.

### 5. Joint development platform (joint-dev):

This is the current project am working on. Its a **Django** web framework where specific group of developers are to meet and and discuss. The can create there own group and run there programs as they chat in real time. I have also integrated google meet for them to hold meetings. The project is to have also a chat AI like chat-gpt. I will also incorporate restful API's .

## Experience

---

**Software Developer** - 05/2023 to 08/2023  
**Siniam .inc**, Nairobi

- Collaborated with clients to gather requirements and understand project scope.
- Led development efforts for various software projects, ensuring adherence to client specifications and deadlines.
- Worked closely with a team of developers, designers, and project managers to deliver high-quality software solutions.
- code reviews, and testing procedures.
- Participated in client meetings to provide updates on project progress and gather feedback for iterative development.
- Supported and maintained existing software systems, troubleshooting issues and implementing enhancements as needed.

## Education

---

**Bachelor of Science:** Computer Science – **2021- 2024**  
Laikipia University, Nyahururu.

**Secondary Education:** **2016 - 2019.**  
Emining Boys Highschool.

**Primary Education:** **2004 - 2015.**  
Betla Junior Academy

## Certifications

---

- Data communication (certificate): **Huawei.**
- Linux Essentials: **CISCO**
- Get Connected: **CISCO**
